Dark Web Breach Assessment & Security Training

Deep Web

Dark Web

- Scan the Dark Web to assess risk
- Provide engaging security training to your employees
- Reduce the chance of a data breach

What is the Dark Web?

Due to its anonymity, cybercriminals use the Dark Web as a place to buy and sell stolen information. Most stolen personal information will end up here.

How do I know if my business is at risk?

We can run a Dark Web Breach Assessment and show you which accounts have already been involved in a breach. See which employees are putting your business at risk.

How can I reduce the risk for my business?

Implement our engaging online security training to all of your employees to educate them on how to spot and avoid phishing, phone and social media scams cybercriminals will use to target them.
